Calling using the remote control

Point the remote control at the key set of the KonfTel 100 R.
Press On/Off on the remote control and wait for a tone.
Then dial in the number.

Pressing On/Off terminates the loudspeaking call.

The last number dialled is repeated with REDIAL.

Calling with a standard telephone

A standard telephone can be connected to the intermediate plug on your KonfTel 100 R. Pick up the handset on the standard telephone and dial in the telephone number. Press On/Off for the loudspeaking function and then replace the handset.

Pressing On/Off terminates the loudspeaking call.

Incoming calls

The green LED on KonfTel 100 R lights up to indicate an incoming call. Press On/Off to answer in loudspeaking mode.

You can also answer a call with your standard telephone, and then switch to loudspeaking mode by pressing On/Off. Then replace the handset.

You may wish to tell the caller that the call is now being answered in loudspeaking mode.

General

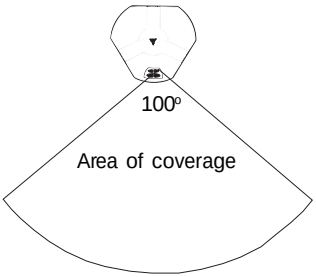
You can switch from loudspeaking mode to your handset at any time. First lift the handset, and then press On/Off to disconnect KonfTel 100 R. You can now speak into the handset as usual, and you can also use the key functions of the telephone.

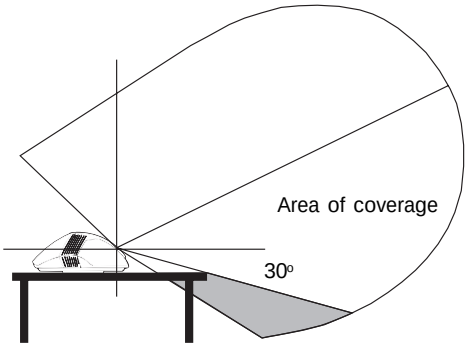
Remote control area of coverage

When using the remote control (optional), account should be taken of the area of coverage of the IR receiver. The remote control has a range of up to 5 metres, provided the area is free of obstructions.

Note that the range can be affected by strong sunlight, strong fluorescent lighting or an obstructed view.

Desk-top



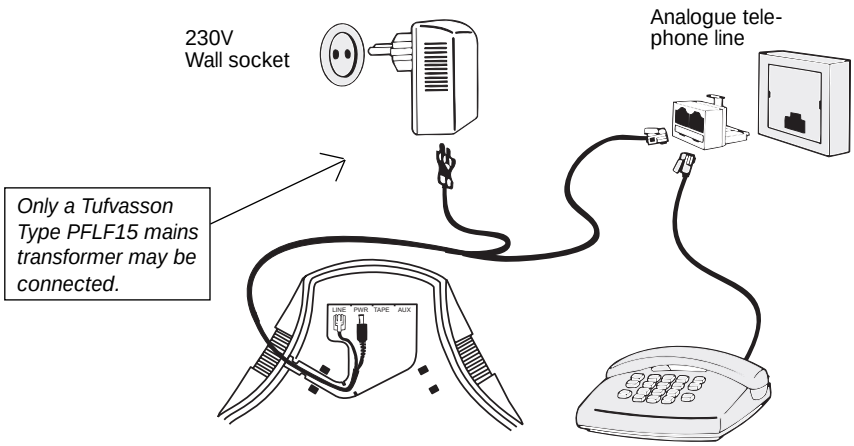


Obstructed view

The KonfTel 100 R conference unit is designed to function in rooms of up to approximately 25 m^2 *with normal acoustics.* (KonfTel can offer other systems for larger premises).

The unit's omni-directional microphone has a fantastic ability to pick up sound. This allows you to position KonfTel 100 R more or less wherever you like in the room. Try it out to see and hear for yourself.

Avoid positioning objects, for instance the leaves of potted plants or lamp shades, directly above (0.5 metre) the microphone.



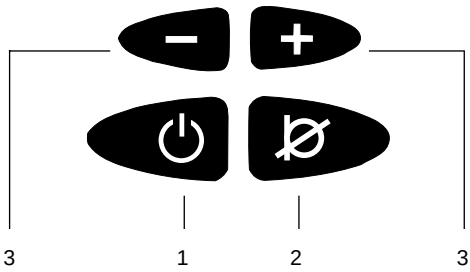
Automatic adjustment

When you switch on the KonfTel 100 R, it automatically adjusts to your room and your telephone line. KonfTel 100 R senses the acoustics in your room and adjusts itself continuously for the duration of the call.

Manual adjustment

– and + or TRIM

KonfTel 100 R can be adjusted manually to eliminate any echoes during the call.
Press the – and + keys simultaneously. You will hear a brief noise.



Key functions

1 On/Off key Switches KonfTel 100 R on and off.

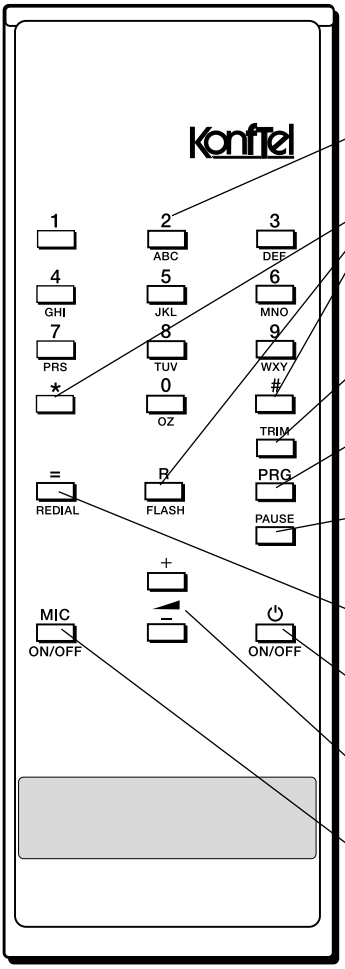
2 Mute key Switches the microphone on/off.

3 + and – keys Pressing repeatedly will increase or reduce the loudspeaker volume. After the call, KonfTel 100 R remembers the set volume until it is changed once more.

These keys can also be used to make the ringing signal louder or lower by pressing – or + when KonfTel 100 R is switched off.

KonfTel 100 R is adjusted by pressing the – and + keys simultaneously during a call.

REMOTE CONTROL (OPTIONAL)



0 – 9
Numerical keys.

R, Star and Hash
These keys are used to access all services available at modern exchanges.

TRIM
Adjusts KonfTel 100 R.

PRG
Programming of speed dial numbers.

PAUSE
Enters a pause when programming speed dial numbers.

= REDIAL
Repeats the last number dialled.

On/Off
Switches KonfTel 100 R on and off.

+ and –
Volume control.

MIC On/Off
Switches the microphone on and off.
Mute function.

Mute function

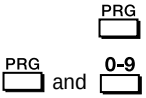
Switches off the microphone, and the red LEDs are extinguished. Press again to switch on the microphone.

Tape recorder outlet

An outlet for a tape recorder is provided on the bottom of KonfTel 100 R. The outlet is designed for a Tele 3.5 mm tape recorder connector.

Store speed dial numbers

– KonfTel 100 R switched off



Press PRG to open the memory.
Enter the desired telephone number including PAUSE, * or #, if any. Press PRG. Select the storage location, from 0-9. Note that an old number already stored in the same location will be replaced without prior warning.

– KonfTel 100 R switched on

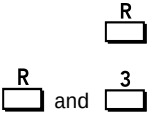
Dial the desired number. Press PRG. Select the storage location, from 0-9. Note that an old number already stored in the same location will be replaced without prior warning.

Pause is used to enter a pause when dialling - this may be necessary for certain exchanges and country codes.

Retrieve speed dial number

Switch on KonfTel 100 R and wait for the dialling tone. Retrieve a speed dial number with PRG followed by its position. Press R to retrieve several numbers.

Three-party calls



Call the first participant. Press R and wait for a new dialling tone. Call the second participant. End with R followed by 3. Three lines are now connected in a conference call. Note that three-party calls cannot be connected via certain company exchanges.

Trouble shooting

1 Check that the microphone is connected. The red LEDs must be lit.

2 Adjust KonfTel 100 R manually.

3 Check that KonfTel 100 R is connected to an *analogue* telephone jack.

4 Check that all cables are correctly connected.

5 Bypass any extension cables and check that the system is functioning correctly. If not, contact your dealer.

The microphone and loudspeaker are connected by pressing one of the On/Off keys. The green indicator lamp on the key set lights up to show that KonfTel 100 R is connected, and the three red LEDs light up to show that the microphone is switched on. The functions of the standard telephone remain disconnected for as long as KonfTel 100 R is switched on.

Maintenance

Clean the equipment with a dry, soft cleaning cloth. *Do not use any liquids!*

Control unit

Power supply:	Transformer 230V AC/13V DC, 1.2A (Tufvasson Type PFLF15).
